

No other model can offer such a high level of personalized comfort to each of its guests. Thanks to the optional Cubicomfort™ Triple-Motion technology each seat has three independent, electrically-operated motion mechanisms, allowing the person in each seat to adjust the position of the seat cushion, backrest, footrest and headrest according to their own preferences. It's so easy to go into full relax mode, thanks to a smart switch on the side panel which also comes with a USB port.
