

Leggiadro has an unmistakable design characterized by a light, distinctive look: the armrest has an original wing shape and is finished by a border around the edge. The dual power mechanism lets you adjust separately headrest and footrest through a button placed on the inside of the armrest - to customize your relaxation. In addition, the high backrest ensures a high comfort even for tall people. The sofa rests on two metal bridges with a sophisticated, elegant design, available in a unique matt black finish.
