

A linear and compact sofa, perfect for all spaces and styles. The Dual Power Mechanism activates the recliner and the headrest to adjust separately. The headrest can be moved electrically up and down and manually tilted until you find the right position. The Zerowall System allows you to activate the recliner function without needing to move the sofa aside from the wall. Thanks to a USB port you can connect your devices and use them while sitting comfortably on the sofa. Optional rechargeable battery pack available separately.
